

Here is the step-by-step guide based on your screenshots to download and install Microsoft 365:

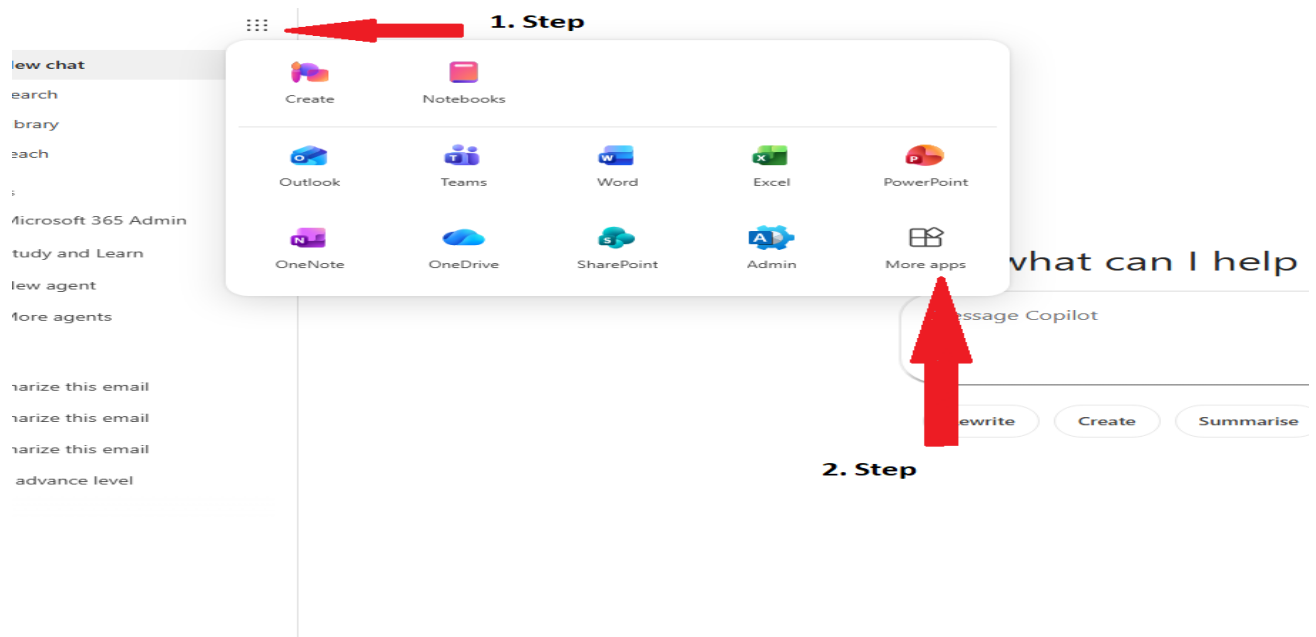

Step 1: Search and Sign In

- **Office.com**
- **Sign in with your outlook /Microsoft account**

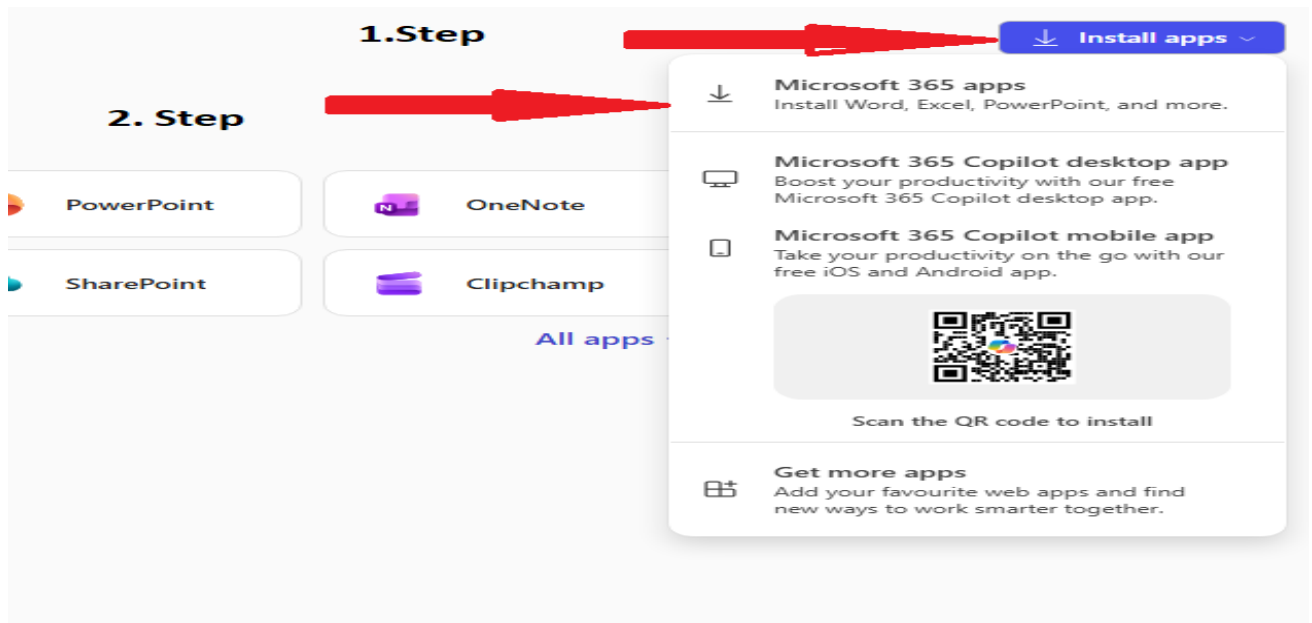

Step 2: Access More Apps

- Once logged in, click on the **App Launcher** icon (the 9 dots) in the top-left corner.
- From the drop-down menu, click on **"More apps"**.

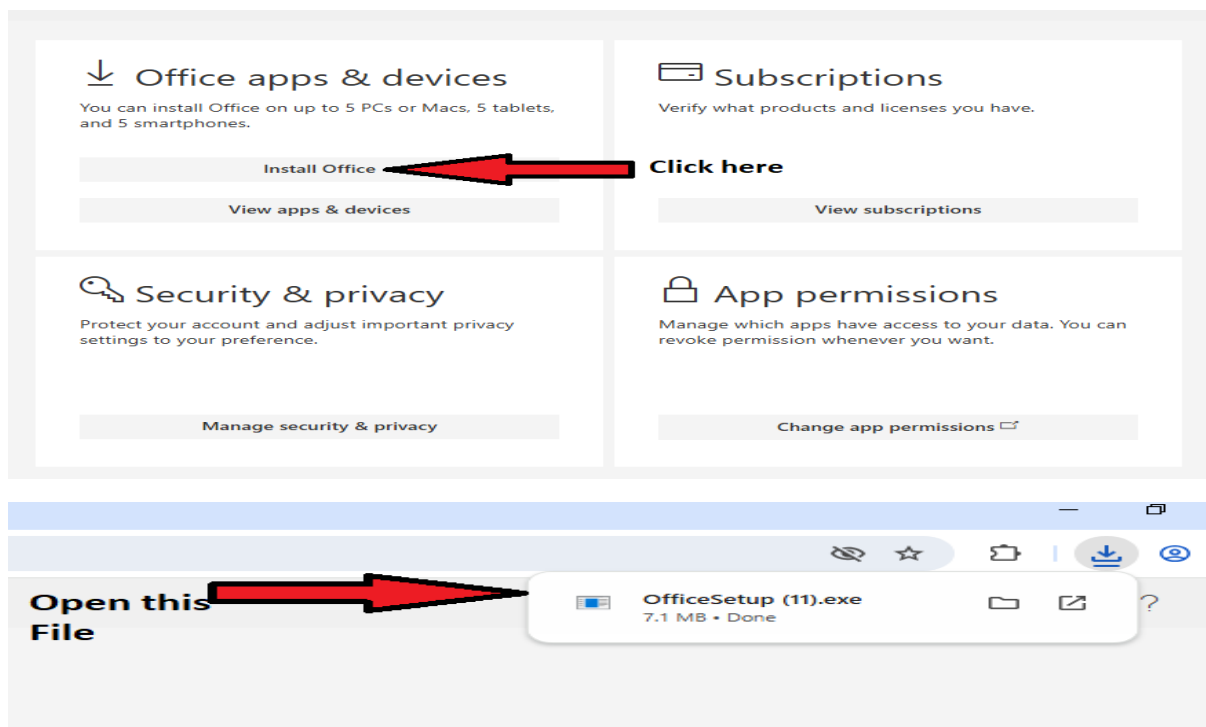

Step 3: Select Install Apps

- On the Apps page, locate and click the **"Install apps"** button in the upper-right corner.
- From the drop-down menu, select **"Microsoft 365 apps"**.

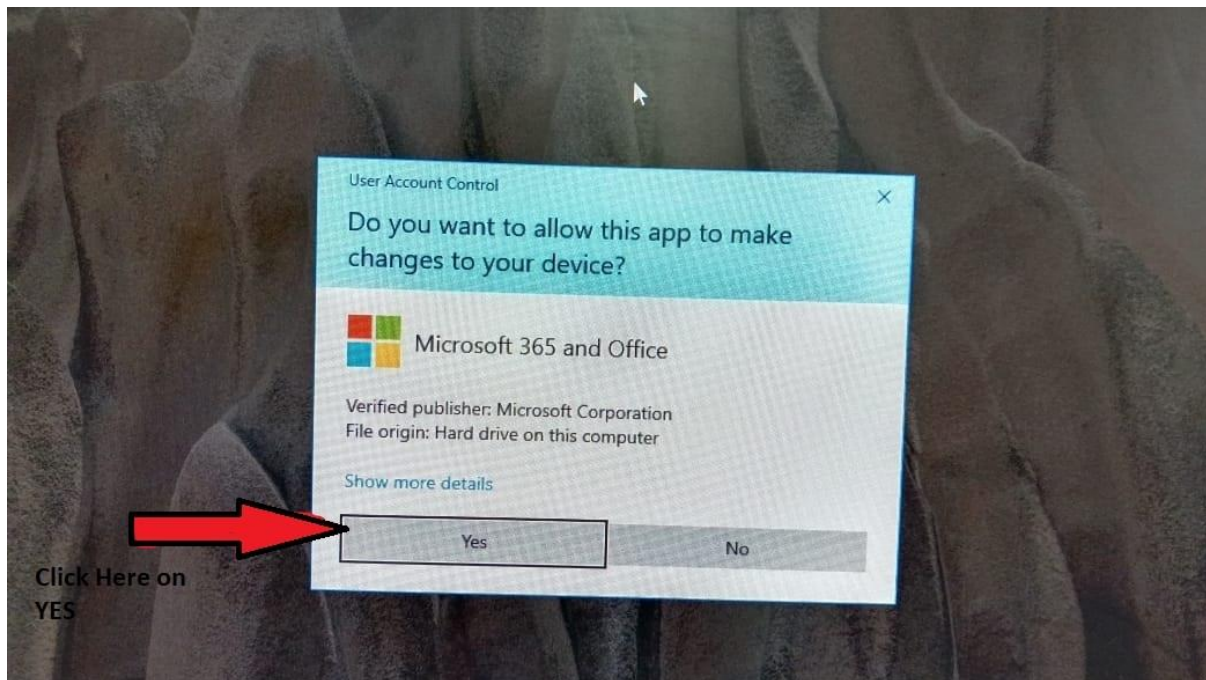

Step 4: Confirm Office Installation

- You will be redirected to the "Apps & devices" settings page.
- Click the orange **"Install Office"** button.

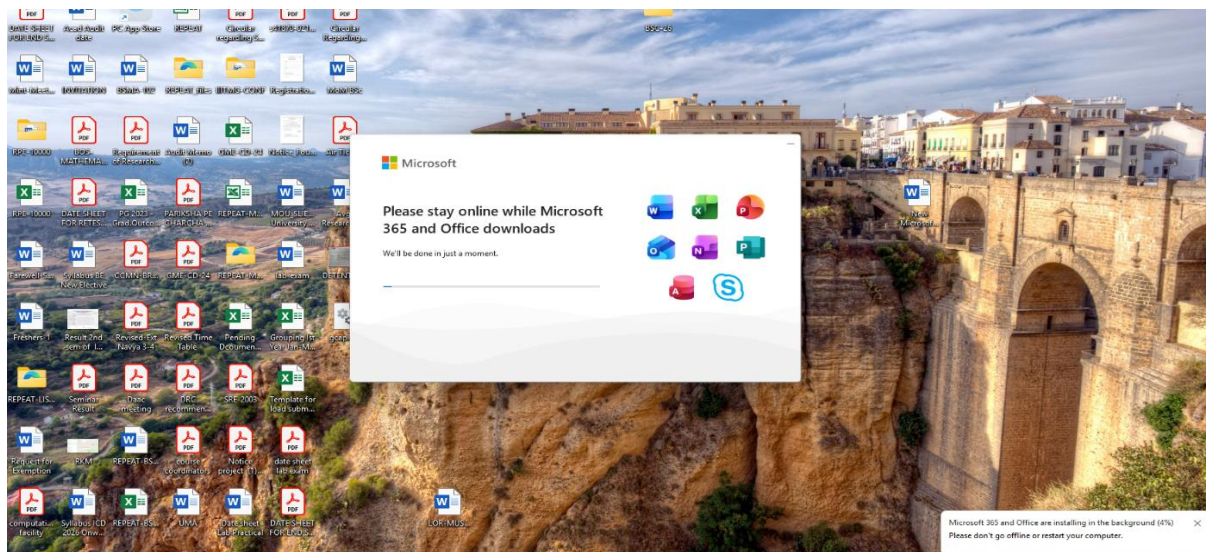

Step 5: Run the Setup File

- The setup file will start downloading automatically.
- Once downloaded, look at your browser's Downloads section in the top-right corner and click on OfficeSetup.exe to open it.

Step 6: Complete the Background Installation

- A Microsoft window will appear stating, *"Please stay online while Microsoft 365 and Office downloads."*
- Keep your computer connected to the internet and do not restart it until the background installation reaches **100%**.

Step 7: Sign in the Blank Page of MS Word Right Corner
